# 1. Origin of the Number

A number is closely related to sound and action. The Zero represents the Nirakar Brahma or infinity. In fact, this world has originated from Zero and all the things in the world get themselves merged with it. This Zero is subtle as well as infinite (Sookshma and Vrihad). If we look around us we find that the entire world is circular. The sky looks like a Zero; the earth, air, water, fire and such things look like a Zero. Likewise, our physical constitution is also like a Zero. So, the power of Zero is infinite and this Zero was invented by our saints and sages and today it is accepted by the entire world. Today, we are in the age of computer which is also based on Zero itself. It is called a dot in the language of computer.

The universe originated from zero which was considered to be one and one only. It means that there is some unknown and unseen power that runs and governs this world the way it likes. We call this power Brahm. This Brahm is the only power, however, it is called by different names. The man found only two stars in the sky the Sun and the Moon when he came into existence. So, there are only two seen planets and none else that can guide the mankind. The Sun rises every day, so it has been given the first place and number one represents it. The Sun, the lord of number one, is associated with the soul. This helps man know the Atmashakti (psychic force) of the individual and the community.

The night was created by the Moon and hence it has been given the second place and it represents number two. It stands for worldly pleasure. It bestows reasoning faculty to us. The Sun is considered to be a masculine planet. In real life, the man has been preferential treatment. A woman has two sides - one is of a girl and the other of a woman i.e. wife. Both the sides have their own entities. The Moon is considered to be a feminine planet and a woman has Kalaas like Moon. A woman becomes Shuddha (clean) after twenty-seven days like the Moon that transits over all the constellations in 27 days.

The man came to know the power of Brahm when found the sky, the earth and the waters and thus number three came into existence. So, this number three was considered to be the number of vastness and Jupiter was accepted as its lord. Jupiter is associated with the soul. This makes people know the vastness of the world and the soul. We have only three gods who are the lords of Trishakti-desire, knowledge and performance. There are three attributes in these three powers i.e. Trishakti. Lord Brahma is Satoguni having the qualities of goodness and purity. Lord Vishnu is Rajoguni

and Lord Shiva is Tamoguni. All the three lords have three powers-creation, protection and destruction respectively. Or, desire the Brahmi Shakti, Performance Vaishnavi and knowledge is that of Gauri. All these three powers represent Moon, Sun and Fire respectively. The three stages of life i.e. childhood youthfulness and old age are also represented by these three powers. In childhood, body of a boy or a girl grows up like the Kalaas of the Moon, in youthfulness, it shines like the Sun and senility leads towards fire i.e. destruction. In the body of a man or a woman, Ida, Pingala and Sushumha are the nerves more important than the others. The man has only three Karmas (deeds) Sanchit (accumulated), Prarabdha (destiny) and Aagaami.

When the man opened his eyes wide in the world he found four directions, from which emerged number four. This number of four represents four streams of the Vedas, four sub sections or divisions of theirs and four castes in the society. The number was entrusted to Rahu or Herschel the symbol of change, of aggressiveness. Herschel is associated with worldly pleasure. This gives elan vital (Jeevan Shakti) to the man. The number represents the four states (Jaagrataadivastha). All the four religions, four places of pilgrimage are merged into this number. There are four kinds of the body vegetation i.e. sprouting from beneath the ground (udbhijja) tree, sweat born (swedaja) - worm and insect, born out of an egg (Andaja) - serpent, fish, bird and born from the womb. We have four treasures- Annamay, mental (Manomaya), consisting of knowledge or science (Viggyanmay), consisting of happiness (Anandmay).

After this the man came to know the five elements essential for life, of which the body consists - earth, water, fire, air and ether. Then he knew the five attributes-sound, touch, form, taste and smell. Then five deities were descended to represent these five attributes and thus came number five into existence. The god gives us knowledge, wisdom and voice. Mercury became the lord of number five. Mercury stands for mental happiness. It makes the man know the wisdom and conscience. This number of five represents our Panchshaktis, Panch Ratnas, Panch Vanas, Panch Kamdeva, Panch Kalaas, Panch Makaaras, Panch Bhootas, Panch Richas, Panch Pranas etc.

Then came tastes of which there are six kinds - sweet, salty, bitter, acidity, astrigent and sour. There are six kinds of philosophy-education, form, grammar (Vyakaran), Nirukti, Chhand and Astrology (Jyotish) or Vedanta, Sankhya, Meemamsa, Vaisheshik, Nyaay and Logic. There are six Amnaayas - Poorvaamnaay, Dakshinaamnaay, Paschimaamnaay, Uttaraamnaay, Urdhvaamnaay and Adhamaanaay. All the seasons are six in number. Likewise, there are six kinds of pleasure, six treasures, six Dakinis, six paths, Shatkon Yantra and six bases. The number of six was entrusted to Venus. Shukracharya was versed in Mritasanjeevani, Tantra-Mantra and sixty-four Kalaas, which are all under the influence of Venus. Venus renders mental pleasures. It affects

directly the sentiments and emotions of the mankind. All the glory, virility, reputation, Shree(prosperity), knowledge and form are the six qualities Samashti (totality) of which is called Bhagya. Hunger, thirst, grief, Moh(infatuation), period of old age and death are the six stages of the body. This number of six denotes the veins, bones and MAJJA, blood, skim and flesh of the body of a person.

As the man started watching the sky, he got acquainted with the Saptarshi. He found seven rivers and their seven streams. He knew the seven notes of music and thus the number of seven was introduced. All these are the Saptaloka(the seven worlds) of ours. There are seven ways to hell. Planet Ketu or Neptune is considered to be the lord of this number of seven. Neptune gives mental happiness. It gives the man imaginative faculty. The number of seven represents Saptaloka, seven mountains, seven seas, seven planets, seven kings, Saptrishis, seven Samidhas(sacrificial firewood), Saptajihvas of fire, seven horses of the chariots of the sun, seven colours and seven metals.

The man started worshipping Ashta Bhairavas, Ashta Siddhis and Ashta Peethas to protect all the things stated above. This number is said to be under the influence of Saturn, who either afflicts the man or gets him free from agonies and afflictions. Saturn gives material happiness. It has the powers to weaken the body of the man. There are eight Vasus (serpents), eight mothers, Asht Nadis and Marmas, Asht Gandhas, Asht Paashaas(chains) - Ghrina (abhorrence), Lajja (modesty), Bhaya (fear), Shoka (Grief), Jugupsa (disgust), Kul (lineage), Sheel (moral conduct) and Jaati (caste). All the living beings are surrounded by these Paashas. They, who are free from these, are Sadaashiva.

After this the man came to know the nine goddesses, nine gems (Nava Ratnas), Nava Nidhis, Nava Rashas, Nava Pravas, and all of these are governed by this number of nine. This number was established to be independent and free and planet Mars is its lord, who is the commander of planetary system. Mars is associated with the soul. It makes the man know the feelings in him. The sum total of numbers cannot be more than nine. All the calculations or geometrical formula are based on this theory. Some examples are being cited below :

Seven ages (Sat Yuga Praman)	172800=9

We use rosary to chant Mantras, which is made of 27, 54 or 108 beads. The sum total of these numbers also happens to be 9. A man breathes 21600 a day i. e. in 24 hours. Sum total of which is 9. It is supposed that there are 72000 Nadis in our body. Here also the sum total of these Nadis is 9 Similarly, the Sum total of 18 Puranas, and 108 Upanishadas is 9 respectively.

There is a theory in Tantra according to which this world is Trigunatmak. See the calculation in this regard given below:

## 2. Mysterious Power of the Numbers

We see different things around us in different forms. If mixed, two or more colours make some different ones. For instance, if yellow and red colours are mixed, we get orange colour as a result. Therefore, hundreds of thousands of colours can be made this way. But, basically there are only seven colours as we see in a rainbow. These seven colours can be observed by a prism in the sunlight. Though if seen without a prism or a thing like this, the sunlight looks colourless. Sunlight is the root of these seven colours.

All the five essential elements – earth, water, fire, air and ether – are found there in every thing seen. These elements are mixed in different ratio and through different ways. Some things have an element in abundance whereas the same element in some other thing is less than that. This is true that the whole world is made of these five essential elements. These elements have originated from the sky – air from sky, fire from air, water from fire and earth from water. 'Sound' is the attribute of the sky, 'touch' of air, luminosity (from) of fire, taste of water and smell is the attribute of earth. As the sky is the base of all the matters in the world, so 'sound' is the chief quality of all the things. This is why sound has been called 'Shabd Brahma' i.e. sound is the symbol of the Almighty.

All the words are the symbols of Brahma. But the qualities and effects of the words are different. The power of every word can be measured by transforming it into number. If chanted 7000 times, a word achieves its totality whereas some other word achieves its completeness after being chanted 17000 times. Our Rishis and Maharshis were well acquainted with the relation between the number and the word. Therefore the Mantra of the Sun should be chanted by 7000 times, of Moon by 11000 times, of Mars by 10,000, of Mercury by 9000, of Jupiter by 19000, of Venus by 16000, of Saturn by 23000, of Rahu by 18000 and that of Ketu should be chanted by 17000. There are 5 letters there in the Mantra of a deity whereas in that of some other there are 9 or 22 and so on. So, there is a close relation between the word and the number which is scientific.

Number and act (deed) are closely associated with each other. Zero represents the Nirakar and Nirvikar Brahma whereas '1' represents the Advait form of the same. It means that like the word, the number is also the base of all the things. The sky is considered to be Zero. Both the word and the number have originated from Zero. There would not have been a provision for making a rosary of 108 beads in our scriptures had there not been a relation between a number and a thing. Every number has got its importance. Chanting of a Mantra on a rosary of 25 beads gives Moksha, on a

rosary of 30 beads it gives wealth, on a rosary having 27 beads accomplishment of self interest, on a rosary of 54 beads fulfilment of desires and on a rosary of 108 it gives accomplishment of all Siddhis. But in Abhichar Karm, a chanting on a rosary of 15 beads is sufficient.

What is the mystery behind a rosary of 108 beads? The Sun completes an orbit at it completes its transit in a sign. There are 360 degrees (Amshas) in an orbit. Thus if we want to change the degrees into Kalas, we should multiply the degrees of 360 by 60. We shall get 21600 Kalaas(Phases) as its product. The Sun remains in summer solstice for six months when it is on north equator and for six months in winter solstice while it is to the south of equator. These two states of the Sun are called Uttarayan and Dakshinayan respectively. Now, if we divide this sum total of 21600 into two parts we shall get 10800 as its product.

Here is an other method of calculation. The period between one sunrise to the next is said to be equal to 60 Gharis. There are 60 Palas in a Ghari and 60 Vipalas in 1 Pala. Thus, if we multiply 60 Gharis by 60 Palas and then the product by 60 Vipalas, we shall get 216000 as Vipalas. Now, if this total of 216000 Vipalas is divided two parts, we shall get 108000 Vipalas for day and 108000 for night.

Our ancient Rishis had made the 'Kaala', i.e. time and 'Samkhya' i.e. the number their base of calculation as it is done today in a scientific way in terms of rupees, paise, measurements etc. The number of 108000 is the result of this very equation. If the last three Zeroes are removed according to the decimal system, we shall get 108. Our ancient Rishis had developed a system through which the qualities of a man could be known by making out the sum total of his name and all the letters there in it. Jaya Parajaya Chakras have been cast somewhere later in this regard. Numerology, the science of Mantras etc. help us find as to who is the debtor of whom between the two- the debtor or the lender because the act of giving and taking is done by numbers itself. See Tantrasar in this connection.

Today the scientists find out as to which eatable has how much nutritives in it by calculating its calories. Likewise, which name a person will be stronger than any one else by changing his name into numbers. The name of a man is his entity. According to some scholars, the consciousness of a man remains active even while he is sleeping. This keeps him conscious. A man sleeping among some people awakes if he is called by his name. This has been mentioned in Narapati Jaya Charcha that the name of a man should be kept into consideration by which he is called and awaken. The 'name' and the 'number' have been proved helpful in prediction from the very beginning of the history of mankind.

There is a coordination between a particular number and the thing related with it like a television, which telecasts a particular programme it has been set for.

It has been proved by new researches that some insects can communicate their messages to insects of the same group. Here again the example of television can be cited as done earlier. If the insects are put in different places in different groups in garden, they all will gather in a single group at a certain point of the garden. It was found during a research that some flies of a particular kind, divided into two groups and both the groups were kept several miles away from each other, gathered in a single group after a short while.

Scatter some grains of corn in a jungle and birds will come to peck them. Spread some sugar, ants will pounce upon it. Take the dead body of an animal to a lonely place and leave it there, soon the vultures and kites will start hovering over it. Tie a goat or a buffalo with a tree in a forest, a lion will come to eat it up. It means, that things of same group get attracted to each other. Similarly, persons having number 1 will be attracted to each other. This is a general rule.

Numerologists know that number '1' will prove favourable for a man having number '1' as his radical number and he will have friendship with some number '1' people. Likewise, number '2' will prove to be favourable for a man having the same number as Radical number and he will enjoy friendship with a man of the same category of number.

Absolute explanation of Numerology is not possible. Why only 18 Chapters are there in Bhagvadgita ? Why do we have only 18 Parvas there in the Mahabharat ? What is the scientific reason behind the number of Puranas 18 in number? The sum total of this '18' is  $1+8=9$ . Why? We can merely follow the path shown by our ancient saints and sages. Why are there only 12 Skandhas in Shrimadbhagvat? The 10<sup>th</sup> Skandha was so large that it had to be divided into two parts- 'Poorvardh' and 'Uttarardh'. So, why was the scripture not divided into 13 skandhas ? Why only 12? Why the Parayan of the Ramayan was performed in 9 days and that of the Mahabharat in 7 days? Why are only 24 letters there in Gayatri ? Why only the Saptapadi is performed in marriage? Why is Chaturthi performed for Ganesh, Ashtami for Durga, Saptami for the Sun, Ekadashi for Vishnu and Pradosh Vyapini Troyodashi for Rudra? All these questions related to Numerology can not be explained here. Numerology is very deep. you can benefit yourself by studying deeply the rules mentioned in it and can find as to which is unfavourable.

### Colours of numbers and notes of music

All the seven colours of a rainbow are there in numbers. Likewise, there are seven notes of music. A table in this regard is given hereunder mentioning there in the number representing them.

Number	Note of music	English	Colour	Lord
6	Sa	A	Blue	Venus
3	Re	B	Violet	Jupiter
1 or 4	Ga	C	Orange	Sun or Rahu
8	Ma	D	light blue	Saturn
5	Pa	E	Yellow	Mercury
2 or 7	Dha	F	Green	Moon or Ketu
9	Ni	G	Red	Mars

Venus governs music, arts, literature and sentiments and emotions. So, the first note of music 'Sa' and colour blue were entrusted to it. The blue colour of it acts like a medicine. Colour blue and note 'Sa' represent peace. They keep the nervous system in order and pacify anxiety and anger. 'Sa' is used in every instrument of music to keep its rhythm proper.

Jupiter is a planet of optimism. It represents vastness. The more the number of disciples the more expanded will be the Ashram of a Guru. Violet colour is powerful and represents optimism. It is used as a guide as the second note of music 'Re' is used.

The Sun governs life. Everybody likes its golden rays. Its rays look golden during morning. The third note of music 'Ga' renders power and strength.

Reddish blue is the colour of Saturn. Saturn represents gloom. Gloom grows in the mind of a philosopher while he is in deep meditation. This gloom represents reddish blue. Diligence is its chief element. It possesses the depth of a sea i.e. it is as deep as a sea. It is closely related to the fifth note of music, which signifies gloom.

Mercury is said to be associated with yellow colour. This is the most glowing colour. Mercury symbolises dynamism, wisdom and conscience and eloquence in speech. We can see a thing properly while it is in light. Mercury is the most lustrous planet. So, it always keeps everybody awakened i.e. it keeps the mind conscious. The fifth note of music has also the capacity to keep everybody awakened like a baby does by making a sound of Pa-----Pa-----Pa.

Moon is associated with green colour. You might have observed that a silver coin catches green stains. In a pond, the water contains green moss. The rays of Moon make the earth green that makes us happy. The sixth note of music 'Dha' represents metal and the Moon governs all the chemicals.

Red is the colour of Mars. It represents struggle, injuries, blood, wounds, death, murder etc. It also represents sharp, pointed and shining things. All these things create pricking sensations in eyes. Likewise, red colour symbolises fear, which is the symbol of Mars. The last note of music 'Ni' shows the intensity of the same.

### 3. Finding out the Radical Number

Here, the theory of finding out the Radical number is described. The number is found out by the date of birth of a person. It can be found by Janma Tithi also, if the date of birth of the native is not available. Suppose that the date of birth of a native is 1, then his Radical number will be 1. Likewise, the Radical number will be 2, 3 of 3, 4 of 4, 5 of 5, 6 of 6, 7 of 7, 8 of 8 and that of a native born on 9 the Radical number will be 9. However, the Radical number of a person born 10 will be  $1+0=1$ . Likewise, if the date of birth of a person is 11, his Radical number will be  $1+1=2$ , 3 of a person born on 12 ( $1+2=3$ ), 4 of whose date of birth is 13 ( $1+3=4$ ), 5 of who was born on 14 ( $1+4=5$ ), 6 of born on 15 ( $1+5=6$ ); 7 of whose date of birth is 16 ( $1+6=7$ ), 8 of born on 17 ( $1+7=8$ ), 9 of 18 ( $1+8=9$ ), 10 of 19 ( $1+9=10$ ), 2 of 20 ( $2+0=2$ ), 3 of 21 ( $2+1=3$ ), 4 of 22 ( $2+2=4$ ), 5 of 23 ( $2+3=5$ ), 6 of 24 ( $2+4=6$ ), 7 of 25 ( $2+5=7$ ), 8 of 26 ( $2+6=8$ ), 9 of 27 ( $2+7=9$ ), 10 of 28 ( $2+8=10$ ) i.e. 1 ( $1+0=1$ ), 11 of 29 ( $2+9=11$ ) i.e. 2 ( $1+1=2$ ), 3 of 30 ( $3+0=3$ ), 4 of 31 ( $3+1=4$ ) and so on.

There is one more method for finding out the Radical number of a person. There are 30 days in a month and the month begins from the first day i.e. Pratipada of Shukla Paksha. The number of Pratipada after Purnima will be 16, 17 of Dwitiya, 18 of Tritiya. This way the number of Amavasya Tithi will be 30. So, there are 15 Tithis in Shukla Paksha from its Pratipada to Purnima i.e. from 1 to 15. Likewise, in Krishna Paksha also there are 15 Tithis from its Pratipa to Amavasya i.e. 16 to 30. These days, the Roman numbers are accepted everywhere to be used. But if the Roman date of birth is not available, then prediction can be made by Radical number found on the basis of Tithi.

An easy way to find out the Radical number of a number is that it (the number) should be divided by 9, the quotient will be the Radical number. In case, the quotient is 0, then 9 will be the Radical number. A detailed description in this regard is given below.

#### Radical number 1 Sun

The Radical number of a native born on 1, 10, 19 or 28 is 1. People having 1 as Radical number are under the influence of the Sun. They happen to be steady and firm in their stands. People born on a date between 21<sup>st</sup> March to 28<sup>th</sup> April possess all the qualities and attributes of number 1 because the Sun transits over Aries during this period and it (the Sun) remains exalted being all powerful during these days. People born in between 21<sup>st</sup> July to 28<sup>th</sup> August also have the influence of number 1 or of the Sun since during this period the Sun transits over its own sign Leo. Aries and Leo both are fiery signs. This is why the nature of these people happens to be like that of a lion. They, themselves make their ways. According to Sapharial, number 3 keeps vibrating the people having 7 as their radical number. Numbers 2 and 6 attracts them whereas 1 and 9 are their enemies. Number 4, 5 and 8 give mixed results. Monday is the most favourable day for them.

## **Radical number 8 Saturn**

Saturn is the lord of this month. This is the radical number of the people born on 8<sup>th</sup>, 17<sup>th</sup> or 26<sup>th</sup> day of a month. The Sun transits in Sayan Capricorn and Aquarius between 21<sup>st</sup> December and 19<sup>th</sup> February. These are signs of Saturn. So, Saturn puts its effects over the people born in the months said above.

Natives having number 8 as their radical accomplish their important jobs but others fail to recognise their importance and hence remain unsympathetic towards them. Naturally, they get disheartened at times. They feel loneliness. Moreover, due to lack of lip service, these people are considered dry, indifferent and stone hearted. The truth, however, remains just reverse. In fact they mind their own job and are absorbed in the same. This, at times, leads to enmity and breeds contempt. They are highly ambitious – working hard to attain high post or position. Sacrifice and hard labour become their way of life. They face lots of troubles and for them life itself is like an uphill task.

Under the influence of Saturn, these people scale heights in life bit by bit. Attaining success by overcoming odds of life becomes their habit. They never get scared of failures. Of course, a sense of dejection grips them at times. In fact, lethargy is their chief enemy – causing failures repeatedly. Therefore, it is advised that such a native should never postpone any job. As told earlier, they accomplish lots of, important jobs and that ultimately earns them name and fame. However, their working-style is beyond comprehension for many who ultimately turn enemy.

The people of this category do not have dashing-pushing nature. Hence, they are seen as tough and heartless whereas they are too sentimental and soft at heart. They

in fact remain lost in their own job most of the time. They rather try hard to remain in themselves but as a negative outcome invite lots of criticism.

They have a sense of sacrifice in them. They never withdraw from hard labour. They take unwavering stand in the face of all odds. This is why they cross all hurdles and attain success at last. It is believed that people under influence of Saturn are laborious and for them success may come late but remains permanent with them.

Number 8 carries and reflects certain characters like rise in life, sudden changes, disorder, hard headedness and whims, etc. But on the other side the natives show philosophical mysticism, religious fervour, purposefulness, eagerness to accomplish the task at hand, and a fatal aptitude toward their job. They feel that they are different from others. Therefore, they feel loneliness at heart. Their good deeds never get acknowledged in their life time. But, after death they are put on pedestal – worshipped and get garlanded.

Those who fall under weaker or lower area of Number 8 have a fight with humanity itself and meet a painful end. Similarly, purposes of those who are on higher are of the Number are considered wrong by others. In fact, since time immemorial, this number of 8 is considered as symbol of human justice in mystic sciences.

Devoid of any fancy and frills, these people are peaceful and large-hearted. They hide their emotions and let others form their opinion – good or bad. Natives with this number are either two successful or a miserable failure in their lives. Being highly ambitious, they aim for social or governmental status. They succeed in getting higher posts and are ready to sacrifice any thing. So for all practical purposes, this number is not considered lucky. The natives may face endless misery and losses of all types.

Saturday is auspicious for such natives. Sunday and Monday too are good. Therefore, they should start an important job on these Days. Dates 8, 17, 26 are also favourable. December 21 to February 19 is better to start new ventures. Dark grey, black, dark blue etc. are favourable colours. Light colours are not advisable. The natives can befriend people with 4 as radical i.e. whose date of birth is 4, 13 or 22. Friendship with people born on 8, 17, or 26 is agreeable and lasting.

Important years of such natives are 8, 17, 26, 35, 44, 53, 62, 71, 80 and 13, 22, 31, 40, 49, 67, 76, etc. There is a possibility that all important events of the native's life will take place in these years.

Under the influence of radical number 8, the calendar years, sum total of which is 1, 4 or 8 prove to be eventful. The years are 2006, 2015, 2024, 2033, 2042, 2051, 2060, 2069, 2078; under the influence of friendly number 4 they are 2002, 2011, 2020, 2029, 2038, 2047, 2056, 2065, 2074 and under influence of friendly number 1 the calendar year 2053, 2062, 2071, 2080.

A native with radical 8 has friendship with people with numbers 1 and 4. Hence, number 1, 4 and 8 are eventful for these natives. Numbers 2, 5, 7 and 9 are even while 3 and 6 are odd with such natives. Days, dates, months and years related to the said friendly, enemy and even numbers too cast their influence on the native with this number as radical. The natives must put on blue sapphire all the time.

Now, we should have a look at Cheiro's opinion on number 8 in the following text. According to Cheiro, the natives having this radical number should wear all shades of grey, black, dark blue and reddish blue. If such a native wears any lighter shades, he/she will appear peculiar, as something is amiss.

As number 8 is of Saturn, Saturday is a day of fortune for them. Number 4 casts its influence on Sunday and along with Monday as well. Therefore, Saturday, Sunday and Monday are important days for the people with radical number 8.

People born under the influence of 8 should start their projects on 8, 17 and 26 of any month as these dates are important for their own number 8. January and again on 19<sup>th</sup> and 20<sup>th</sup> of February the success will be multifold. These dates are related to number 8. Moreover, if these dates fall on Saturday, Sunday or Monday the result is even more effective. Along with these numbers other dates related to friendly number 4, 13, 22, and 31 are beneficial for these people.

Gems beneficial for them are Neelmani, dark coloured sapphire, black pearl or black diamond. They should take all care that these gems touch their body.

It is difficult to explain number 8. This symbolizes spiritualism and materialism both. In fact, a close look reveals Number 8 as two circles touching each other. It is made up of two 4s. So, since ancient period this is being considered as indicator of undivided fate for people and the nation. In astrology, it indicates Saturn. The latter too is considered as star of fortune.

In the opinion of Sapharal, people with radical number 8 have good vibe with people having 2 as their radical number. The former gets attracted towards people with number 1 and 4 whereas Numbers 3 and 9 repel them. With numbers 5, 7 and 9 such natives remain even i.e. well. By all means Saturday is favourable for them.

## Radical Number 9 Mars

Mars is the lord of radical number 9. People, born on 9th or 27th, have number 9 as their radical number. The Sun remains in Aries and Scorpio between March 21 to April 27 and again October 21 to November 27. These are the signs of Mars. These people are courageous and never give up. They are fast and in hurry, naturally. They wish to finish off all their jobs as soon as possible. But they should shun any such feats. They should never take up adventurous jobs like circus, motor cycle games, car race, etc. Scaling mountain peaks too has its hazards for them. But, then, such people love these things and go for horse riding, etc. They are successful in administration and management. But, there is a word of caution: Never pick up fights at home or elsewhere. This is because they are short tempered. They cannot bear criticism. On the other side, they can easily be trapped by a woman's treacherous love. They come under influence of flattery and are foxed easily. aspire to gain fume as headman of the family. Given full control of the situation, such natives are capable of managing all affairs with effect. For instance, if multiplied by 2, 9 gives 18, sum total of which is 9. This is applicable in all instances and we get 9 only.

All shades of red and pink are favourable colours for these people. Tuesdays, Thursdays and Fridays are important for them. But, Tuesday, being the day of Mars, is more important.

## 5. Numerology and Name

First letter of name has a great significance in numerology. This decides zodiac sign and Nakshatra. In some parts of India there is a tradition of changing bride's name according to the name of her husband. In some parts of south India as well as in Britain, some royal families the eldest grandson is named after his grandfather. In Jews culture, name of a patient on deathbed is kept in their temple with this hope that the patient will recover health. While taking Sanyas or during Poornabhishek, a person's name is changed with this hope that all his earlier Samskaras will drop dead.

People mostly have two names. One is that of sign while other nickname. In any auspicious function, deciding a Muhurt for long journeys and while weighing pros and cons of result native should pronounce Rashi-name. On other occasions nickname is used. But prediction is made on the basis of the nickname of the people whose time and date of birth are not known. Similarly in numerology if date of birth is not known letters of the name of the native serve the purpose. Since most of the books on numerology come from western scholars alphabets of English are used for this purpose. A table is given below in which we see how letters of a name get converted in numbers. It is also dealt with what number is assigned to which letters according to Cheiro and Sapharial.

Which is a preferable name in this mathematical calculation? The name that awakes a sleeping person is the answer to this question. The person's name should be converted in numbers according to the name that appears in his signature. The day Napoleon Bonaparte changed spelling of his name proved to be beginning of his downfall. But the day I myself (the author) changed my name turned out to be beginning of my fateful days. This is a fact. I used to write my name as Harishchand Agrawal. But in 1978 I changed it under influence of numerology. Two months later I got promoted as an officer.

<b>HARISH</b>	<b>CHAND</b>	<b>AGARWAL</b>	
512135	35154	1312613	= 52
<b>HARISH</b>	<b>CHANDRA</b>	<b>AGARWAL</b>	
51235	3515421	1312613	= 55

I added only two letters 'R' and 'A' in CHAND. It became CHANDRA. Numbers 2 and 1 assigned respectively to 'R' and 'A' got added up to 52 which ultimately became 55. Now see below the results and you will appreciate why this change was must.

52 : This is an inauspicious number. Failures, hurdles, quarrels, fights, revolts, etc. are the results of this number.

55: This is a number of leadership. Such natives are over intelligent and religious and leader of others. A table is given below that may be helpful in converting alphabets of any name in numbers. It means the name most popular in society or the name to whcih the person responds immediately. Here we present a method of making name-number by English alphabets. The table for converting letters of English language in numbers is given below:

## 6. Ank Kundli

Ank Kundali is also cast like Janma Kundali, Rashi Kundali etc. based on the theory of astrology. A Kundali, i.e. horoscope is cast on the basis of birth, time, date, month and the calendar year. The 12 houses in a horoscope are meant for 12 signs and the number of sign is put in every of the houses. The planets are also positioned in the houses according to their signs. Likewise, Ank Kundali is also cast on the basis of birth, time, date, month and the calendar year. But there are only 9 houses in it and numbers of planets are put in place of the numbers of signs.

In Numerology, all the 9 numbers are classified into 3 categories that are said to be related to body, mind and soul. In the Panchadashi Tantra, the Yantra of 15 has got its importance. In this Yantra, all the 9 numbers are put in all the houses in such a way that if added up, the total happens to be 15 from every side.

**Panchadashi Yantra**
